

You can limit exposure to Radio-frequency (RF) Energy from your cell phone.

Although studies continue to assess potential health effects of mobile phone use, the World Health Organization has classified RF Energy as a possible carcinogen.

This material was prepared solely by the City and County of San Francisco and must be provided to consumers under local law.

09/11

If you are concerned about potential health effects from cell phone RF Energy, the City of San Francisco recommends:

- **Limiting cell phone use by children**
Developing brains and thinner skulls lead to higher absorption in children.
- **Using a headset, speakerphone or text instead**
Exposure decreases rapidly with increasing distance from the phone.
- **Using belt clips and purses to keep distance between your phone and body**
Do not carry on your body to at least meet the distance specified in your phone's user manual
- **Avoiding cell phones in areas with weak signals (elevators, on transit, etc.)**
Using a cell phone in areas of good reception decreases exposure by allowing the phone to transmit at reduced power.
- **Reducing the number and length of calls**
Turn off your cell phone when not in use.
