## MEMORANDUM

TO: Honorable Members  
Sunshine Ordinance Task Force

FROM: Paul Zarefsky  
Deputy City Attorney

DATE: September 19, 2006

RE: Providing Electronic Records In PDF Rather Than Word Format When Responding  
To A Public Records Request

---

This Office has orally advised City departments that, in response to a public records request for an electronic copy of a record, a City department may provide the record to the requester in PDF<sup>1</sup> rather than Word format. In this memorandum, we address the legal principles supporting this conclusion. The issue potentially affects all City departments, because all departments maintain electronic records. The volume of such records is huge, and we expect that the issue will arise in future public records requests for electronic records.

We address this issue from two perspectives – (1) protecting "metadata" hidden in the electronic record and (2) protecting the text of the electronic record. This memorandum does not address any complaint before the Task Force. Rather, we intend to provide general advice on this issue.

### **Protecting Metadata Hidden In The Electronic Record**

A Word document – unlike an electronic record in PDF format – contains "metadata." This term generally refers to information about an electronic record that does not appear in the text but is automatically generated by the program when a text is created, viewed, copied, edited, printed, stored, or transmitted using a computer. The metadata are typically embedded in the record in a manner not readily viewed or understood by persons without specialized computer training, that enables one to locate information that is not shown in the text. We use the term "metadata" broadly to include any information embedded in the record that is not visible in the text.

The metadata may include a wide variety of information that the City has a right – and, in some cases, a legal duty – to withhold from public view. For example, earlier versions of an electronic record are present in metadata and often will include recommendations of the author of a draft, which the Sunshine Ordinance allows the City to withhold from disclosure. (S.F.

---

<sup>1</sup> The term "PDF" is an abbreviation for Portable Document Format. As the term suggests, a PDF record functions as a "portable" document in that it may be transmitted electronically as a whole document and viewed and read on a computer screen. A scanned PDF record essentially is a picture of a document that may be viewed and read on a computer screen. A searchable PDF record permits the viewer/reader to search the document for specific words or phrases and to cut and paste from the document. Neither type of PDF record contains metadata embedded in the record.

Admin. Code §67.24(a)(1).) Such passages could include edits that are part of the author's thought process and were never intended to be communicated to another person. As a second example, earlier versions of an electronic record that are present in metadata may include information the disclosure of which would violate a third party's privacy – a right the law zealously safeguards. (Cal. Gov. Code §§ 6250, 6254(c); S.F. Admin. Code §67.1(g); Cal. Const., Art. I, sec. 1.) A wide range of types of information may be encompassed within the right of privacy; everything from residential phone numbers and Social Security numbers to sensitive medical, financial, and sexual data to information provided by, and the identity of, whistleblowers. As a third example, metadata may include communications between attorney and client that do not appear in the text of the record. The law protects confidential attorney-client communications from disclosure. (Cal. Evid. Code §954.) These examples are merely illustrative of the broader point that metadata may contain information specifically subject to redaction under the Public Records Act and the Sunshine Ordinance.

If a department were to give a requester a document in Word format, the department would be required to review the metadata embedded in the document. Failure to conduct this review would risk disclosure of privileged material. Yet reviewing the metadata would be a laborious, burdensome, and problematic task – different in nature and magnitude from the process of reviewing the text to determine information that should be redacted and information that is reasonably segregable from that which should be redacted. Electronic records may be adapted from any number of earlier texts – which would themselves contain metadata – and may have been subject to numerous edits. Information recorded in the process of creating and editing the text of such a document may be unknown to the author, the sender, and/or the recipient. The investigation necessary to determine whether redactions in metadata are legally warranted would in many cases be daunting. Merely identifying and interpreting certain of the metadata would require considerable expertise beyond the skill and capacity of all but a small number of City employees. And there is considerable risk that even those with the expertise would not locate all the metadata.

In addition, the metadata embedded in a Word document could reveal sensitive information about the operation of the City's computer and communications system that could be used by a third party to undermine the integrity and security of that system. For example, the disclosure of such information as unique identifiers for individual computer terminals and computer servers, and the location of information in a department's computer system, could compromise the integrity and security of the system. We do not understand that disclosure of metadata alone would in itself permit an unscrupulous individual to "hack" into the City's computer system. But should such an individual find his or her way into the City's system, knowledge about metadata gleaned from a Word document made available to the public could make it easier for that person to navigate his or her way through the system, locate sensitive files, alter or delete documents, and generally undermine the security of records within the system.

In making decisions about disclosure of public records, the City may not inquire as to a requester's purpose, or the use the requester may make of the information obtained. (Cal Gov. Code §6257.5; S.F. Admin. Code §67.25(c).) Requests from prudent, civic-minded persons must be treated the same as requests from reckless or ill-motivated persons. Further, disclosure of a record to one member of the public generally precludes the City from withholding that record from another member of the public. (Cal. Gov. Code §6254.5.) Thus, even if the City is certain that a particular requester has a legitimate purpose and would not misuse – or even review –

RE: Providing Electronic Records In PDF Rather Than Word Format When Responding  
To A Public Records Request

---

information contained in the metadata of a requested record, the City does not have the luxury of indulging benign assumptions about requesters when determining its response to a public records request for an electronic record in Word format.

These problems must be understood not from the vantage point of one isolated electronic record that may be the subject of a Task Force hearing. City government is comprised of scores of departments and even more boards, commissions, and advisory bodies, and there are literally millions of electronic records within the City's files, that have been created, edited, transmitted, or received by a workforce of approximately 25,000 to 30,000 employees. The staff resources of the City – technical, professional, and clerical – that may be devoted to responding to public records requests are limited.

If the City is required to disclose documents in Word format in response to a public records request, there could be a significant adverse impact on the conduct of City business – both everyday public business, and the business of responding to public records requests. The City has no control over the number and scope of public records requests it receives, or the number and scope of requests filed by a single person or small group of persons. The added burden of having to review metadata in electronic records could be crippling if the City is required to provide electronic records to requesters in Word rather than PDF format.

The City's duty to respond to a public records request is limited by a rule of reason. It has long been understood that public records laws do not impose absolute requirements on public entities. Rather, the efforts required to respond to a public records request are inherently bounded by a standard of reasonableness. In *Bruce v. Gregory* (1967) 65 Cal.2d 666, the California Supreme Court articulated this elementary principle of public records law:

We ... hold that the rights created by [predecessor statutes to the Public Records Act] are, by their very nature, not absolute, but are subject to an implied rule of reason. Furthermore, this inherent reasonableness limitation should enable the custodian of public records to formulate regulations necessary to protect the safety of the records against theft, mutilation or accidental damage, to prevent inspection from interfering with the orderly function of his office and its employees, and generally to avoid chaos in the record archives.

*Id.* at 676. Both the California courts and the California Attorney General have extended *Bruce's* implied rule of reason to public records requests under the Public Records Act. (*Rosenthal v. Hansen* (1973) 34 Cal.App.3d 754, 761; 64 Ops.Cal.Atty.Gen. 186, 189-91 (1981) [Op. No. 80-1106]; 64 Ops.Cal.Atty.Gen. 317, 321 (1981) [Op. No. 80-1006]; 76 Ops.Cal.Atty. Gen. 235, 241 (1993) [Op. No. 93-702].)

There is no indication that the Board of Supervisors, in adopting the Sunshine Ordinance in 1993, or the voters, in amending the Ordinance in 1999, intended to jettison this longstanding principle of public records law. Indeed, in the context of assessing under both the Public Records Act and the Sunshine Ordinance the reasonableness of a search for records, the San Francisco Superior Court has ruled that the same reasonableness limitations applicable to the Act apply as well to the Ordinance.<sup>2</sup>

In addition, Section 67.21-1(a) of the Sunshine Ordinance states that "[I]t is the policy of the City and County of San Francisco to utilize computer technology *in order to reduce the costs of public records management, including the costs of collecting, maintaining, and disclosing records subject to disclosure to members of the public under this section.*" (S.F. Admin. Code §67.21-1(a) [emphasis added].)<sup>3</sup>

A court would likely conclude that these principles of reasonableness and cost containment that govern disclosure of public records under the Public Records Act and the Sunshine Ordinance permit the City to decline to provide to a requester metadata that is embedded in an electronic record such as a Word document. To require departments to disclose electronic records in Word format would necessitate their exhaustively searching and reviewing metadata in those records before finalizing a response to the requester. This process would entail considerable cost to the City, given the technical expertise and staff resources that would have to be devoted to it. Imposing this process on the City would contradict the City's own policy of using computer technology to reduce the costs incurred in disclosing public records.

**Protecting The Text Of The Electronic Record**

The text of a Word document may be easily edited or otherwise altered by the requester or by persons to whom the requester makes the document available. The alteration would not be obvious or readily discernible to the average person or even in many cases to someone generally familiar with the document. As a result, providing a record in Word format to a requester jeopardizes the integrity of the record. That format makes it easy for the requester or others to change the record and then present the altered record as the original. Apart from any such questionable purpose, if the City provides a record in Word format and the requester or others edit or otherwise alter the record, there is the potential for creating confusion, even inadvertently, as to whether the original record or the altered version is the true public record.

The Public Records Act allows public entities to address these concerns in making records available to the public. Section 6253.9 of the Act addresses information in an electronic format. (Cal. Gov. Code §6253.9.) Subsection (f) states: "Nothing in this section shall be construed to require the public agency to release an electronic record in the electronic form in which it is held by the agency if its release would jeopardize or compromise the security or integrity of the original record or of any proprietary software in which it is maintained." (Cal. Gov. Code §6253.9(f).) Disclosure of a record in Word format could jeopardize the integrity of

---

not disturbed on appeal. *See Western Select Securities, Inc. v. Superior Court*, Court of Appeal, First District, Case No. A093500, May 3, 2001 (order denying petition for writ of mandate). While a trial court opinion generally may not be cited as precedent in a judicial proceeding (*see* Cal. Rule of Court 977), this trial court opinion nonetheless may shed light on whether a court would be receptive to the point that the Sunshine Ordinance carries forward the principle, recognized both pre- and post-Public Records Act, that public records laws are subject to an implied or inherent rule of reason.

<sup>3</sup> In addition, we note that the Sunshine Ordinance endorses "[I]mplementing a system that permits reproduction of electronic copies of records *in a format that is generally recognized as an industry standard format.*" (S.F. Admin. Code §67.21-1(b)(2) [emphasis added].) It is our understanding that PDF versions of electronic records are generally recognized as an "industry standard format" for providing copies of electronic records.

 To A Public Records Request

---

the record because the text is so easily manipulated. Subsection (f) thus gives City departments discretion to choose to provide the record to a requester in other more secure formats, and nothing in the Sunshine Ordinance changes this result.

We recognize that computer-savvy experts using sophisticated technological aids are able to tamper with electronic records in some formats other than Word. But this possibility does not change the legal analysis. Subsection (f) permits a department to provide an electronic record to a member of the public in a format less susceptible to textual manipulation than the format requested. A Word document is much more susceptible to textual manipulation, as compared, for example, to a record in scanned PDF format. So long as the integrity of the record is jeopardized by making it available in Word format, Subsection (f) permits the City to provide it in another format.

**Conclusion**

A court would likely conclude that a City department has discretion under both the Public Records Act and the Sunshine Ordinance to provide an electronic record to a public records requester in PDF rather than Word format.<sup>4</sup>
